

PDT Drum Rack with Reservoir

The PDT Drum Rack with Reservoir is designed to hold two 55 gallon drums above two Teflon-lined, 15 or 30 gallon reservoirs. The drum rack system includes all fittings and hoses required to make the connections as well as desiccant dryers and fittings for moisture-sensitive materials. This design is especially useful when using a material that tends to settle out over time. Our drum racks with reservoirs are ideal for stationary applications where adhesive usage is relatively high.

FEATURES:

- Hinged upper drum rack for easy mounting
- Top drum raises allowing you to fully empty drum
- Reservoirs are conical shaped to eliminate dead spots
- 15 gallon or 30 gallon steel reservoirs
- Reservoirs are Teflon* coated inside
- Reservoir tops are removable for cleaning
- Quick release fittings for material hose
- Desiccant cartridge feeding drums

OPTIONS:

- Integration with metering systems
- Polyethylene reservoirs
- Material heat exchangers
- Full drip pan with room for meter
- Low level sensors
- Conditioning hoses
- Temperature monitoring
- Drum conditioners
- Custom designs available

WHY PDT?

- Automation and dispensing expertise to fully support your project and streamline transactions.
- Both turnkey and custom solutions to help you improve manufacturing productivity.
- Established quality procedures ensure superior products that keep customers coming back.
- Personal, attentive customer service, competitive pricing, and ongoing product support.
